Top Hinge Toolboxes

Tailored for the Job – A Variety of Configurations to Suit Your Preferred Toolbox Setup.

Weatherproof Sealing That Works on Site

Pinch weld rubber seals are used because they seal properly. They block water, dust, and road grime more effectively than bolts, rivets, or adhesives. Tools stay dry and protected during outdoor work, including heavy rain, helping prevent corrosion and premature wear.

Secure Stainless Steel T Handle With Lock

The stainless steel T handle allows vehicles to be left on site overnight with confidence. Made from 304 stainless steel, it is suited to heavy duty use and repeated operation, keeping valuable tools secure without compromising reliability.

Welded Construction With Durable Powder Coating

Fully welded seams provide strength where toolboxes take the most punishment. The white powder coated finish protects against rust and damage, standing up to rough handling and tough site conditions over the long term.

Designed for Practical Storage Upgrades

Integrated brackets allow drawers or bolt in shelves to be added as needs change. This makes it easier to organise tools, reduce time spent searching, and keep jobs moving efficiently.

Full Length Stainless Piano Hinge

The stainless piano hinge spreads the load evenly across the full width of the lid. This improves stability, reduces stress points, and keeps the lid aligned, avoiding the failures common with barrel style hinges.

Gas Struts Built for Repeated Use

Gas struts allow the lid to open smoothly and stay open, making tool access easier on site. They are mounted to a full width cross beam to prevent twisting or warping, ensuring the toolbox closes securely and continues to perform year after year.

PRODUCT CODE: TS1200 fitted with TSD05 Drawers and 2 x TSS600 Shelves

PRODUCT CODE:	TSDL1200
MATERIAL:	Steel
DIMENSIONS:	1200W x 800H x 1695D mm

PRODUCT CODE: TS008-1200

Truck Toolboxes

Toolboxes for Under Deck

Finish Options to Suit the Job

Available in zinc plated or powder coated steel, aluminium, or stainless steel, the range is built to handle different environments and corrosion risks. Each finish is selected for strength, durability, and long term performance in real working conditions.

Built for Long Term Use

Folded construction with welded seams provides structural strength where toolboxes take the most load. Greaseable hinges support smooth operation over time, helping the toolbox stand up to demanding site work and continue performing as expected.

Sample of Our Range:

PRODUCT CODE: TS002

DIMENSIONS: 400D x 350H x 500W

PRODUCT CODE: TS003SSL

DIMENSIONS: 600D x 500H x 400W

PRODUCT CODE: TA008-1200

DIMENSIONS: 500D x 500H x 1200W

PRODUCT CODE: TA008-900

DIMENSIONS: 500D x 500H x 900W

Plastic Toolboxes

Plastic That Performs – Tough yet Lightweight, Perfect for Corrosion-prone Environments.

PRODUCT CODE: TP024

DIMENSIONS: 500D x 500W x 300H

PRODUCT CODE: TP036

DIMENSIONS: 500D x 500H x 900W

Built to Last in Real Conditions

The weatherproof design protects tools and gear from rain, dust, and UV exposure. These toolboxes do not rust like traditional steel options, making them well suited to harsh outdoor environments and long term use.

Rotary Moulded Construction

Rotary moulding creates consistent wall thickness with added strength at high stress points such as corners and edges. This process is widely used in marine applications and helps the toolbox withstand repeated knocks, vibration, and everyday wear.

Flexible Mounting to Suit Your Setup

Toolboxes can be installed under deck, between the cab and deck, upright, or in other configurations. This flexibility allows you to make use of available space without needing custom builds for every vehicle.

Secure, Practical Storage

A flush key lockable latch keeps tools and valuables secure when vehicles are left on site. Two keys are supplied for straightforward access and backup.

Colour Options to Suit Your Fleet

Black is standard, with additional colour options including grey, green, red, yellow, and blue. Lid and box colours can be mixed to suit vehicle setup or fleet identification.

Built Tough in New Zealand

Designed and manufactured in New Zealand for local working conditions, with durability and reliability front of mind.

PRODUCT CODE: TP036

PRODUCT CODE: XF24

Mudflaps

Every Vehicle is a Moving Billboard

Materials That Suit Real Work

Mudflaps are available in flexible rubber, PVC, and rigid plastic, each suited to different applications. Flexible rubber is a common choice for contractors and tip truck operators because it bends on contact with the ground, rubble, shingle, or rocks, reducing damage and extending service life.

Check out our Printed
Mudflap Blog here

Sizes to Match Your Vehicle

Mudflaps are available in a range of widths and heights to suit different vehicle setups. For trucks, the most common width is 600 mm, with standard lengths of 300, 450, 600, 750, and 900 mm depending on deck height. Custom sizes are available, and the TransQuip team can advise on the right fit for your vehicle.

A Straightforward Process

Every printed mudflap order starts with a practical discussion. Our in house team checks artwork, confirms sizing, and runs test prints to ensure alignment and durability before production. We manage the full process from setup through to delivery, so there are no hand-offs or guesswork.

Custom Printing for Fleet Use

We print on most shapes and sizes, from light commercial vehicles through to heavy transport. Logos can be positioned, double printed, or applied to custom Duraform mudflaps to suit fleet requirements and branding needs.

Reliable Turnaround

Printed mudflap orders are typically completed within 10 working days from artwork approval. Quotes are clear and turnaround times are realistic, helping you plan without delays or surprises.

Answer your questions
about Mudflaps here

Types of Mudflaps:

Plasflap & Plasflap Plus:

- U.V stabilised, durable, rigid mudflap.
- A special blend of tough co-polymer resins.
- Rigid plastic, flat both sides.
- Manufactured to withstand sub-zero winter conditions.
- Specially formulated for excellent shatter resistance.
- Proven to outlast other mudflaps in demanding environments.
- Expels grease and dirt for easy cleaning and good appearance.
- Looks great with the permastamp personalised print.
- Large range including custom made sizes and colours.
- Available in black and white colours.

Extra Flex:

- Flexi plastic, flat both sides.
- A special blend of tough co-polymer resins.
- U.V. stabilised, durable, rigid mudflap.
- Manufactured to withstand sub-zero winter conditions.
- Specially formulated for excellent shatter resistance.
- Does not curl.
- Well proven to outlast other types of mudflaps.
- Expels grease and dirt - easy cleaning & fantastic appearance.
- Looks great with the permastamp personalised print.
- Large range of sized including custom made.
- Comes in black and white.

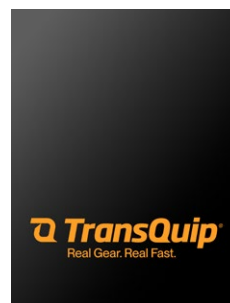

Duraform:

- PVC moulded mudflaps.
- High quality and U.V. stabilised.
- Durable, flexible mudflap with an attractive raised border effect.
- Does not curl.
- Superior substitute for rubber products.
- Available in a range of pre-moulded sizes.
- Can be moulded to display your logo in raised lettering.
- Comes in black and white.

Rubber Grooved:

- Grooved on 1 side.
- A unique blend of rubber and plastic.
- High quality printable rubber.
- Co - extruded polyethylene and natural rubber.
- Flexible.
- Anti spray ribs to channel water to the road to reduce spray.
- Looks great with the permastamp personalised print.

Rubber:

- Strong virgin rubber - not recycled rubber.
- Ideal where a plain, durable black rubber mudflap is required.
- Cost effective.
- Available in industry standard sizes.
- Great for tippers and asphalt trucks.
- Printing is not available for these.

Hardware

Add Those Finishing Touches to Your Vehicle to Make it Perfect!

Truck Ladder, 2 and 3 Steps.

A pull-out step ladder provides safe, easy access to elevated areas on vehicles or trailers. Designed to slide out when needed and stow away when not in use, it helps reduce strain, prevent slips, and saves space—ideal for frequent access to toolboxes, decks, or roof-mounted equipment.

	Product Code:	Size	Description
	4192	530W x 660L x 530H	2 step pull out ladder with platform. 180kg SWL.
	4193	750W x 430L x 600H	3 step pull out ladder with platform. 180kg SWL.
	4178	430W x 660L x 530H	2 step pull out ladder. 300kg SWL. - Zinc-plated.
	4179	430W x 750L x 600H	3 step pull out ladder. 300kg SWL. - Zinc-plated.

Anti-luce Catch

	Product Code:	Size	Description
	8433	Shaft 12 x 46mm	Zinc plated Anti-luce “bolt on.
	8434	Shaft 12 x 12mm	Zinc plated Anti-luce “weld on, short.

Polythene Corner Board

Polythene corner boards protect palletised goods by reinforcing edges and preventing damage from strapping, impact, or load shift. Durable and reusable, they help stabilise loads and reduce product damage in transit or storage.

	Product Code:	Size	Description
	7304	470mm long	Tough and light.
	7305	135mm long	Tough and light.

Our Range:

Load Anchor

A load anchor provides a secure point for tying down or restraining cargo during transport. It's designed to handle high tension and can be mounted to trailers, utes, or truck decks to keep loads stable and prevent shifting.

	Product Code:	Size	Description
	7405	103 (W) x 130 (L) mm	- Capacity: 6000kg. - Chain size: Hook for a 8mm chain. - Eye diameter - 40mm. - Load anchor, flat mount.

PRODUCT CODE: 7508

DIMENSIONS: 7.3-10mm

DESCRIPTIONS:
Cradle Grab Hook Lever Twitch G70.

PRODUCT CODE: 7505

DIMENSIONS: 7.3-10mm

DESCRIPTIONS:
Cradle grab hook ratchet twitch.

PRODUCT CODE: 7402

DIMENSIONS:
115mm (W) x 125mm (L) x 22mm (D)

DESCRIPTIONS:

- D-ring recessed into mounting fitting, 1850kg break strength.

PRODUCT CODE: 7400

DIMENSIONS:
15 (W) x 35 (L) x 10 (H) mm

DESCRIPTIONS:

- Mount Anchor: 38.1mm.
- Mounting: Surface mount.
- Break: 2,272kg.
- Weight: 0.3kg.

PRODUCT CODE: 4110

DIMENSIONS:
35mm bent bar diameter, 20mm latch, 20 latch pin.

DESCRIPTIONS:
Swinging tailgate hinge kit with top and bottom hinge, latch and pivot.

PRODUCT CODE: 4111

DIMENSIONS:
40mm bent bar diameter, 35mm latch pin, 30mm latch.

DESCRIPTIONS:
Swinging tailgate hinge kit with top and bottom hinge, latch and pivot.

PRODUCT CODE: 4095

Hexchex

Keep Your Wheels on Tight!

HexChex wheel nut indicators provide a clear visual check to help identify loose wheel nuts before they become a serious safety issue. If a nut moves, the indicator moves with it, making problems easy to spot during routine walk around and pre trip checks.

The multi size design suits a wide range of vehicles, and the ratcheting system locks the indicators in place without tools. Installation is straightforward, and once fitted, they provide ongoing, low effort monitoring that supports safer fleets and more reliable compliance checks.

Available Colour:

● Green ● Orange ● Red ● Yellow

HexChex Wheel Nut Indicators

	Product Code:	Wheel Nut Dimensions
	4095 - 1923	19 - 23mm
	4095 - 2033	23 - 30mm
	4095 - 3088	30 - 38mm
	4095 - 3850	38 - 50mm

PRODUCT CODE: 3709

Wheel Chocks

Stop Your Truck Rolling Away!

Wheel chocks are used to stop vehicles or trailers from moving during loading, servicing, or parking. The heavy duty rubber construction provides strong grip on surfaces such as concrete and gravel, while the wide base and angled profile deliver stable, reliable wheel restraint. Supplied as a pair, they allow balanced placement on both sides of the wheel for consistent holding.

A wheel chock holder provides a simple, secure storage solution when chocks are not in use. It keeps chocks easy to access, reduces the risk of loss or damage, and helps ensure they are available whenever vehicle or trailer restraint is required. Suitable for mounting on trucks, trailers, or in workshop environments.

Wheel Chock

	Product Code:	Weight	Dimensions
	3709	3kg each	260 (L) x 160 (W) x 190 (H) mm
	Product Code:	Weight	Dimensions
	3708	10.5kg each	360 (L) x 290 (W) x 265 (H) mm

Wheel Chock Holder

 3725	Product Code:	Description
	3725	- Single small wheel chock holder made out of 3mm zinc-plated steel for longevity and strength. - Only for 1 x 3709 wheelchock.
	Product Code:	Description
	3726	- Wheel chock holder made out of 3mm zinc-plated steel for longevity and strength. - Can hold either 2 x 3709 small wheel chocks or 1 x 3708 large wheel chock.

Fire Safety

Be Prepared for the Worst & Cover All Fire Bases!

PRODUCT CODE: 3512

Dry Powder Fire Extinguishers

Dry powder fire extinguishers are designed to suppress common fires involving solid materials, flammable liquids, and electrical equipment. They are easy to mount and operate, making them suitable for vehicles, workshops, and job sites where fast response can limit damage and protect people.

Fire Extinguisher Brackets

Fire extinguisher brackets secure extinguishers during transport or when mounted in vehicles, workshops, or on site locations. They prevent movement and damage, keep extinguishers accessible, and support compliance by ensuring safety equipment stays in the correct position. Quick release design allows fast access in an emergency.

Fire Extinguisher Cabinets

Fire extinguisher cabinets protect extinguishers from weather, dust, and impact while keeping them clearly visible and easy to reach. Suitable for vehicles, buildings, and worksites, they help maintain equipment condition and readiness without compromising access.

The Fire Terminator Extinguisher Spray

Provides fast, proven suppression of lithium battery fires, stopping thermal runaway, and all A to F class fires. Safe to use in confined vehicles and work environments, it delivers long term reliability with no servicing, simple operation like spray paint and not testing or tagging needed with a 10 year shelf life time.

Emergency Hammer

Emergency hammers are compact safety tools designed to break vehicle windows and cut seat-belts in the event of an accident. Commonly fitted in commercial vehicles and public transport, they provide a simple way to exit a vehicle when doors or systems cannot be used, helping occupants reach safety quickly.

Fire Terminator Extinguisher Spray

	Product Code:	Description
	3400	- Kills fire at its core, even LITHIUM! Stops Lithium battery fires & thermal runaway. One of the only portable solutions proven effective. - Plant-based & non-aerosol. Safe to use in confined vehicle cabs, depots, workshops, or warehouses. Non-toxic & eco-friendly.

PRODUCT CODE: 5515

Spill Kits

Make Sure You're Prepared When Accidents Happen!

Spill kits provide the equipment needed to contain and clean up liquid spills quickly in workplaces, vehicles, and on site environments. They are suited to both hazardous and non hazardous substances, helping stop spills from spreading and causing further risk.

By allowing immediate response, spill kits help protect workers, reduce environmental impact, and support health and safety compliance. Having the right kit on hand means spills are dealt with properly, without delay or unnecessary disruption.

PRODUCT CODE:	5515
DESCRIPTIONS:	Oil only spill kit in bag 20L

KIT INCLUDES:	
▪ 14x SpillTech Oil Pads 200gsm.	▪ 1x Pair of Clear Safety Glasses.
▪ 1x Mineral Sponge 3kg Bag.	▪ 1x SpillTech Waste Disposal Bag.
▪ 1x SpillTech Oil Sock 1.2m	▪ 1x Cable Tie.
▪ 1x Pair of Chemical Gloves – XL.	▪ 1x SpillTech Instruction Card.

PRODUCT CODE:	5517
DESCRIPTIONS:	General purpose spill kit 30L

KIT INCLUDES:	
▪ 5x SpillTech Universal Pads 400gsm.	▪ 1x Pair of Clear Safety Glasses.
▪ 1x Spillsorb 25L Absorbent Fibre Bag.	▪ 1x FFP2 Disposable Mask.
▪ 1x SpillTech Universal Sock 1.2m.	▪ 2x SpillTech Waste Disposal Bags
▪ 1x Pair of Chemical Gloves – XL.	▪ 2x Cable Ties
	▪ 1x SpillTech Instruction Card.

PRODUCT CODE: 9622

First Aid Kits & Seat Belts

Make Sure You're Prepared When Accidents Happen!

First aid kits provide the core supplies needed to treat minor injuries on site. Suitable for workplaces, vehicles, and remote environments, they help manage cuts, burns, sprains, and similar incidents until further medical care is available. Having a compliant kit on hand supports safer worksites and meets basic health and safety requirements.

Seatbelt kits include the components required to install or replace a seatbelt in a vehicle. Designed for secure restraint and compliance, they are commonly used in Utes, trucks, machinery, and custom vehicle builds where occupant safety cannot be compromised.

PRODUCT CODE: 9621

DESCRIPTIONS:

Multipurpose first aid kits, will suit most basic first aid requirements for your Ute/truck and even the family car.

PRODUCT CODE: 9622

DESCRIPTIONS:

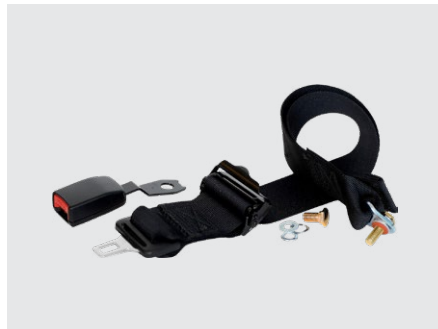

Commercial multipurpose first aid kits for 5 people.

PRODUCT CODE: KI6650

DIMENSIONS:

250mm long flexi buckle.

PRODUCT CODE: KI5373

DIMENSIONS:

135mm long stem and buckle.

PRODUCT CODE: KI7688

DESCRIPTION:

3" ALR seatbelt kit.

Work Lights

**Make it Easy to See Your Work
on Those Dark Nights!**

Flood Beam Work Lights

Flood beam work lights spread wide, even light across a large area. They are ideal for close range tasks such as loading, maintenance, inspections, and general site work where clear visibility around the vehicle or machinery is critical.

By lighting the full work zone, flood beams help reduce blind spots, improve accuracy, and support safer working conditions in busy or confined environments.

Spot Beam Work Lights

Spot beam work lights project a focused, long distance beam to illuminate what's ahead. They are designed for forward visibility when operating in low light, on access roads, or across open sites where seeing hazards early matters.

This concentrated output helps operators identify obstacles, terrain changes, or moving plant sooner, supporting safer decision making when visibility is limited.

LED Light Bars

LED light bars deliver powerful, wide range illumination for vehicles working in demanding conditions. They provide consistent, high output lighting across roads, worksites, and off road terrain where standard vehicle lighting is not enough.

Available in a range of lengths, light bars suit utes, trucks, service vehicles, and heavy machinery. Built for all weather performance, they help operators see clearly, work confidently, and keep jobs moving safely when conditions are tough.

Bar Lights

Make Sure Your Vehicle is Compliant On Every Site!

Check out our full
range here

LED flashing safety bar lights provide a powerful, high visibility warning signal for vehicles operating in low light or high risk environments. Designed to be seen from a distance, they help make vehicles and machinery clearly identifiable in busy, fast moving, or restricted work areas.

Available with clear or amber lenses, the range suits a wide variety of applications and visibility requirements. Multiple mounting options are available, including permanent, magnetic, and temporary fixings, allowing the lights to be fitted securely to fleet vehicles or used flexibly across different jobs and sites.

Answer your questions
about Bar Lights here

Flashing bar lights are commonly used on roads, construction sites, utility work, and emergency response vehicles. They alert other road users and workers to moving or stationary hazards, helping to manage traffic flow and reduce the risk of incidents.

Built for commercial and fleet use, these lights are designed to perform reliably in demanding conditions. They support safer operations, clearer communication on site, and compliance with vehicle visibility requirements where warning lighting is essential.

Micro LED Bar lights (9902 series). Size: 248 long x 172 wide x 37 high mm

	Product Code:	Mounting Type	Lense Colour
	9902-1	Permanent single mount	Clear
	9902-1A	Permanent single mount	Amber

	9904PA	Permanent mount	Amber
	9904PC	Permanent mount	Clear

LED Mini Bar lights (9950 series). Size: 251 long x 170 wide x 42 high mm

	Product Code:	Mounting Type	Lense Colour
	9950-1	Single mount	Clear
	9950-M	Magnetic mount	

LED Beacons

Alert Others to Hazards Quickly With a Beacon!

LED flashing safety beacons deliver a strong, highly visible warning signal to help protect people working around vehicles and machinery in high risk environments. Designed for consistent performance in tough conditions, they ensure your vehicles are seen when it matters most.

The range includes permanent mount, magnetic mount, and flexi pole options, allowing you to match the beacon to the vehicle, task, and operating environment. Installation is straightforward, whether the beacon is fitted long term to a fleet vehicle or used as a temporary solution on site.

Commonly used on work sites, roadside operations, and emergency response vehicles, flashing beacons alert others to moving or stationary hazards. By improving visibility in low light, busy, or confined areas, they help reduce the risk of collisions and near misses.

Built for commercial use, these beacons support safer worksites, clearer communication, and compliance with visibility requirements across transport, civil, and infrastructure applications.

Solar Lights

Keep Your Vehicles Seen at Night Using the Power of the Sun!

Solar lights, including the Solar Powered Night Marker Light, use integrated solar panels to charge during daylight and operate automatically in low light conditions. This provides consistent visibility without relying on external power.

With no wiring or ongoing maintenance required, they are well suited to remote sites, perimeter marking, and mobile applications. Once installed, they deliver reliable illumination in off grid locations, helping maintain visibility and site safety without added complexity.

PRODUCT CODE:	9517
DIMENSIONS:	103mm x 103mm x 25mm
DESCRIPTIONS:	Square Solar powered night marker light.

PRODUCT CODE:	9518
DIMENSIONS:	137mm x 33mm x 50mm
DESCRIPTIONS:	Oval solar powered night marker light.

Directional Flashing
Lights/Grill Lights

Add an Extra Bit of Safety That Keeps Your
Vehicles Highly Visible!

Flashing grille lights, also referred to as directional lights or light heads, provide a strong, high visibility warning signal in a compact format. The focused LED output is designed to clearly signal direction or alert others to a vehicle's presence in busy or high risk environments.

Typically mounted to grilles, bumpers, or rear panels, these lights offer multiple flash patterns to suit different applications. Commonly used on emergency, utility, and service vehicles, they improve awareness in all conditions and support safer operations on road and on site.

Dangerous Goods Flip Sign

Stainless Steel, 17 Messages

The Dangerous Goods flip sign provides a practical way to display the correct hazard placard for changing loads. Manufactured from stainless steel and featuring over 17 clear message options, it allows operators to switch signage quickly so vehicle markings remain accurate and compliant.

By keeping hazard information current, the flip sign supports safer transport and gives emergency responders clear, reliable information when it matters most. Personalised branding options are available to suit fleet requirements.

PRODUCT CODE: 9340

DESCRIPTIONS:

- Back plate constructed out of stainless steel that doesn't rust.
- 350mm x 350mm.
- Strong signs and clips.
- Thicker leaf pages to stop bending and cracking.
- Lug has tabs on the base to hold latch in place.

Rear View Camera Kits & Alarms

Make Reversing Safe for Your Drivers!

Reversing camera kits provide drivers with a clear view behind the vehicle when reversing or manoeuvring in tight or busy environments. By reducing blind spots, they help prevent collisions, protect people on site, and reduce damage to vehicles and equipment.

Commonly fitted to trucks, utes, and machinery, these kits support safer operation around trailers, plant, and confined spaces. Each kit typically includes a camera, monitor, and wiring, designed for straightforward installation and reliable performance on the road or on site.

Reversing Alarms

	Product Code:	Decibel	Voltage	Sound
	4459	102 dB	12-48V	Broadband sound.
	4460	97 dB	12-80V	Broadband sound.
	4461	77-102 dB	12-24V	Self adjusting traditional sound.
	4482	77-97 dB	12-24V	Self adjusting traditional sound.
	4480	102 dB	12-80V	Traditional beeper sound.
	4462	77-97 dB	12-24V	Traditional beeper sound.

Reversing Cameras

Heavy Duty Reversing Camera Kit

PRODUCT CODE: 4484

Ideal for commercial vehicle applications like Trucks, Buses, Combine Harvesters, Tractors, Excavators... In fact, any vehicle where you want to increase your safety factor. Can be powered by 12v to 32v, and has 4 pin screw connections. 12 month Warranty. (Conditions apply.)

Kit includes:	Camera Features:	Monitor features:
7" colour monitor and mounting stand. - One heavy duty camera with heated lens. 20 metre cable. - Wiring and remote control. - Extra cameras and cables also available.	- Waterproof rating IP69K. - Operating Temp -20°C to +70°C. - Lens angle 120 degrees. - Image sensor 1/3" CCD. - TV System NTSC/PAL optional. - Audio function.	- Screen size 7". - Built in speaker. - Contrast, Colour and Brightness adjustable. - Resolution 1024 x 600 RGB. - Input: 2-AV input. - Aspect ratio 16:9 image. 12 – 24v. - Operating Temp -20°C to +70°C.

Extra Cameras and Cables also available

Over Dimension Gear

Keep Your Vehicles Compliant When Moving Oversize Loads!

Hazard Panels

Hazard panels are used to clearly identify specific risks such as dangerous goods or special transport requirements. Mounted to vehicles or trailers, they provide clear, high visibility warnings to road users and site personnel. Built for durability and compliant with transport regulations, they support safer transport and help meet legal obligations.

Oversize Signs

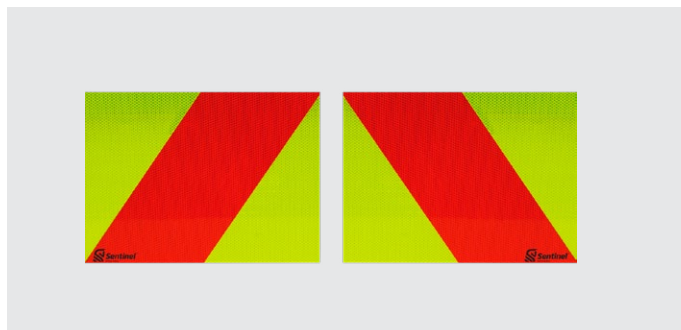

Oversize signs are used to mark vehicles carrying wide or over dimension loads. By clearly signaling increased vehicle width and movement risk, they help other road users make informed decisions. Commonly mounted to the front or rear of transport vehicles, these signs are a requirement for many heavy haulage and escort operations.

Wide Load Follows and Pilot Vehicle Signs

Wide Load Follows and Pilot Vehicle signs are used on escort vehicles supporting over dimension transport. They alert other road users to the presence of lead or follow vehicles and help manage traffic flow around large or slow moving loads. When fitted with a folding mounting kit, the sign can be deployed or stowed quickly, reducing wind resistance when not in use and maintaining compliance without permanent fixtures.

Our Range:

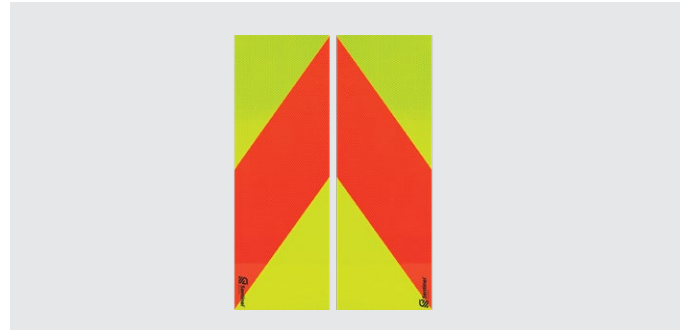

PRODUCT CODE: 9207

DIMENSIONS: 400mm long, 300mm high and 1.6mm thick

DESCRIPTIONS:

- Double Sided Hazard Panel, Alloy, Day/Night.
- 9206R Right hand only Day/night single sided.
