Put the Truck on the Road Much Faster!

"This is the fifth vehicle we have now fitted out with tool boxes from TransQuip. Their website shows good images of what you get and the dimensions. We have ordered using the online site and have arrived within a couple of days. For this application we have used along with an inhouse built sign storage box with a cage on top for storage of road sign legs (built to match the supplied tool boxes).

The supplied tool boxes have been fitted with shelving and draws also supplied by TransQuip which simply bolt into place with existing mountings. We have added internal LED lighting to allow for night call outs.

All in all, we have managed to put this truck on the road much faster than waiting for a body builder to build this for us and at a competitive price."

Palmerston North City Council

PRODUCT CODE: TA1200 (TSS600 and TSD05)

Top Hinge Toolboxes

Tool Security You Can Trust – Lockable, Durable, and Built for New Zealand Conditions.

Weatherproof with Pinch Weld Rubber Seals

Pinch weld seals are preferred for their superior ability to block water, dust, and noise. Outperforming traditional methods such as bolts, rivets or adhesives. Keeping tools dry and protected during outdoor work, even in heavy rain, ensuring equipment stays in good condition.

Stainless T-Handle with Lock

You can leave your vehicle parked on-site overnight with peace of mind, knowing your expensive gear is securely locked in the toolbox. Handles are made of 304 stainless steel. These handles are chosen for their suitability for use in heavy-duty applications.

Robust-Welded Seams & White Powder-Coated

The durable construction withstands rough handling and tough site conditions, providing long-term reliability and preventing rust.

Brackets for Drawer Additions & Bolt-In Shelves

A tradesperson can customise the storage layout, adding drawers or shelves for better tool organisation, enhancing productivity and usability.

Stainless Piano Hinge

The robust piano hinges maintain an even load distribution. This ensures durability and performance and keeps the lid properly aligned. This is opposed to the barrel-type hinges which don't give anything like the same support or stability as all the weight falls on just two vulnerable points.

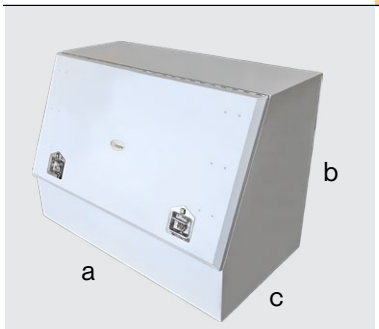

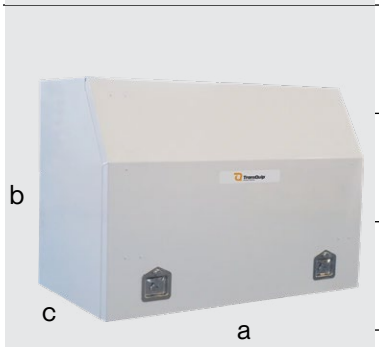

Gas Struts

A technician on a job site can easily access tools without struggling to lift or hold the lid, speeding up repairs and reducing fatigue.

Quality struts are connected to the full-width cross beam on the door, stopping warping and twisting. This ensures the toolbox keeps its shape and closes securely time after time, year after year.

Our Range:

	Product Code	Material	Length (a)	Height (b)	Width (c)	Weight
	TAHS1200	Aluminium	1200mm	850mm	650mm	44kg

	TA1200	Aluminium	1200mm	850mm	650mm	35kg
	TA1400	Aluminium	1400mm	850mm	650mm	43kg
	TS1200	Steel	1200mm	850mm	650mm	70kg

Toolbox fitout gets a thumbs-up from Higgins

Haydn, from Higgins Construction, bought TransQuip toolboxes for a ute fitout for the company's auto sparky. It included a large dual top-opening ute toolbox, with two sets of 5 drawer modules and shelves, and a pair of underdeck toolboxes. The full height doors give access from both sides of the vehicle and provide room for longer items.

Haydn liked these toolbox's versatility which allowed them to set up the shelves and drawers to suit the auto sparky. (Most toolboxes have permanently fixed drawers and/or shelves so don't have this adaptability.) Two batteries fit in one of the under-deck toolboxes and can be used to jumpstart 12 or 24 volt vehicles. An inverter was permanently wired in to provide power to charge battery tools.

The design of the integrated seals of the toolboxes keeps the dust and water out much better than the self-adhesive seals often used. On the TransQuip ute deck and underdeck toolboxes, the rubber seals are quality pinch weld seals providing long-term protection from weather and dust - so tools stay dry and clean. Some other toolboxes have a glued-on seal which will come loose over time and eventually peel off - compromising the weatherproof protection.

As soon as Higgins' other techs, with older utes, saw the new toolboxes they immediately wanted the new toolbox fitouts for their vehicles. Haydn says they love the TransQuip toolboxes because they are so versatile, and can be set up to suit different applications and needs.

Haydn | Higgins

PRODUCT CODE DISPLAYED: TSDL700

On-Deck Double Sided Toolboxes

Twice the Space & Access with the Same Trusted Durability!

Fits Across the Back of a Ute or Small Truck Flat Deck

Maximises storage without getting in the way—great for larger, longer tools.

Ideal for Mobile Mechanics

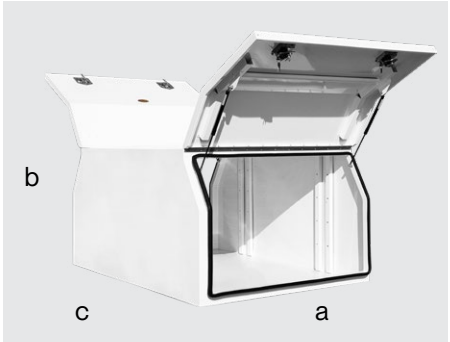

Perfect for on-site repairs—store tools, parts, and gear all in one, easy to reach place.

Lid Opens from Both Sides

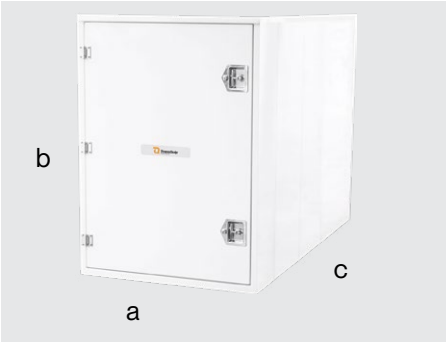

No need to walk around—grab tools from either side of the ute for easy access.

How to Fit Drawers and Shelves to Your Top Hinge Toolbox

People:
You'll need two people to fit these.

Equipment:
Top-hinge toolbox such as our TA1200 or TS1200 & the TSD05 drawers set & TSS1200 or TSS600 shelves.
Bolts provided with drawers and shelves.

Putting the Box on the Ute:
Step one.
In the video we install an alloy option which is 1200mm long (TA1200) or 1400mm long (TA1400). You can also get the 1200mm in steel (TS1200)...

Scan here to watch the video & read the full blog!

PRODUCT CODE: TS1200 fitted with TSD05 Drawers and 2 x TSS600 Shelves

On-Deck Toolbox Accessories

Tailored for the Job – A Variety of Configurations to Suit Your Preferred Toolbox Setup.

Made to fit for Easy Install into Toolboxes

Designed specifically for TransQuip top hinge toolboxes: TA1200, TS1200, and TA1400 toolboxes, ensuring a seamless fit without modifications.

There are shelves to fit full width or half width with a drawer.

Non-Slip Rubber Lining in each Drawer

Prevents tools and small parts from sliding around, keeping everything secure even on bumpy roads.

Secure Latching System

Easy-to-use latches keep drawers firmly shut while driving, preventing accidental openings and tools from slipping out.

Compact but Spacious

The drawer has a depth of 440mm, width of 600mm, and height of 650mm, providing ample storage without taking up excess space for larger tools.

On-Deck Toolbox Accessories

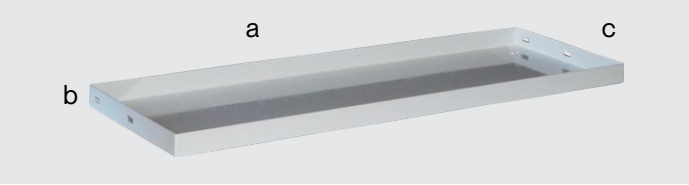

Quality slides for easy opening and shutting.

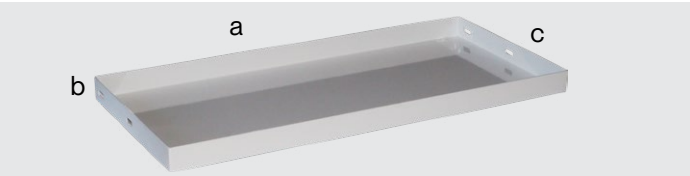

Easy to use latches to keep the drawers shut.

Rubber lining to stop things slipping around.

Answer your Questions about Plastic Toolboxes

PRODUCT CODE: TP036

Plastic Toolboxes

Plastic That Performs – Tough yet Lightweight, Perfect for Corrosion-prone Environments.

Built to Last

Super tough, weatherproof design ensures durability in harsh conditions, protecting tools and gear from rain, dust, and UV exposure, lasting longer as these toolboxes don't rust like a traditional steel toolboxes.

Rotary Moulded

This provides greater wall thickness, especially at stress points like the corners, so they can withstand a lot of wear and tear. It's the same low pressure, high temperature process used to make kayaks and boats.

Versatile Mounting Options

Can be installed underdeck, between cab and deck, upright, or in other configurations to suit any setup, meaning you don't have to waste time building many different toolboxes to suit every space.

Secure Storage

Flush key-lockable latch keeps tools and valuables safe from thieves, with two keys supplied for convenience.

Customizable Colours

Black is the standard colour though it is also available in grey, green, red, yellow and blue. Also with the option to mix and match lid and box colours for a personalised look to suit your vehicle or brand.

Chest Toolboxes

Fast Turnaround, Affordable Prices – Quality Toolboxes Without the Wait.

Suitable for a Range of Uses

Ideal for different trades, tools, or vehicles, so you can buy one type of toolbox no matter what work you do.

Designed for Tough Environments like Worksites or Workshops

Its durability means it has a longer lifespan and less chance of damage under rough use.

The Carry Handles Make Transport Simpler and Safer

Especially if you need to shift the box between vehicles or around job sites. No more time wasted wondering how you're going to move it safely.

Includes a parts tray to keep small items (like bolts or small hand tools) organised and easy to access, reducing frustration and saving time on those jobs where you need lots of different tools.

5 year Quality Guarantee

Our Range:

Product Code	Length (a)	Height (b)	Width (c)

Truck Toolboxes

Smart Storage Solution with Quality User Friendly Features.

Double Protection for Durability

Large range of finishes. Available in zinc-plated or powder coated steel, aluminum or stainless steel finish for superior strength and corrosion resistance.

Professional Look

Matte or chrome finish body with polished stainless doors offers a sleek or tough appearance, perfect for commercial vehicles.

Built to Handle Tough Conditions

Folded construction with welded seams and greaseable hinges adds extra durability for demanding work environments, giving you the confidence your toolbox will last.

Certified Strength & Resistance

Welding meets UNI EN ISO 15614-1 standards, tested for mechanical resistance and waterproofing.

Weatherproof Security

Unique rain gutter channels and weather seals keep tools and equipment dry, even in extreme weather environments as the water just runs off via the rain channels.

Reliable Locking System

Secure your gear with a lockable stainless drop T-latch for added safety.

Safe & Functional Design

Anti-drop lanyards hold the lid in place, preventing the door from swinging any further open and hitting something.

Underdeck Toolboxes

No More Clutter – Organise your Tools Efficiently and Maximise Storage Space.

Maximises Space

Clever underdeck design makes use of otherwise wasted space, while also forming a mudguard shape to fit neatly over the wheel, and means more space on your deck where a toolbox would normally be.

Flexible Installation

Available in both left-hand (LH) and right-hand (RH) models, giving you more options to suit your vehicle layout.

Durable Finish

Comes with a white powder-coated, aluminium, or polyethylene for long-lasting protection against rust and wear.

Secure & Convenient

Fitted with a lockable handle and full door access, so your gear stays safe and easy to reach, or a flush mounted latch for the plastic option for a seamless finish.

Ideal for Messy Gear

Perfect for stowing lashing gear, muddy boots, or dirty equipment you don't want inside your cab.
